

I have had my XM Satellite radio for over a year now and I would not trade it for anything. I just bought a new car and my choice of vehicle was based in part on what models I could get XM Satellite radio in. I listen to the St. Louis traffic and weather station every morning when I commute to work. XM offers channels with programming I cannot get anywhere else. Since I choose to pay for this service I cannot even to begin to understand why the National Association of Broadcasters thinks they can tell me what I can and cannot listen to. Please reject the NAB's petition 04-160 and support satellite radio. Thank you.
